

Announces the Kaspar Credit Card System

Credit Card Reader and TK-Flex Pay Software

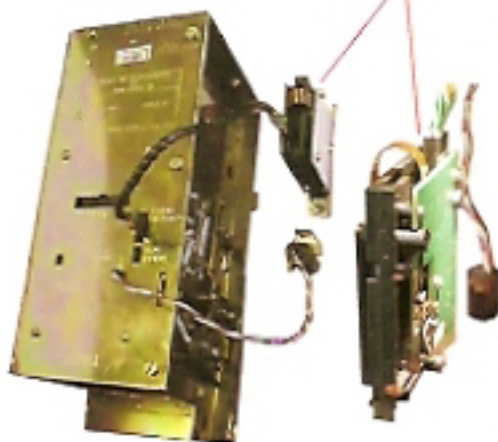

- Customers now have the flexibility to purchase a newspaper with a credit card. No exact change or prepaid Smart Card is necessary to purchase a paper.
- * Credit Card sales can be batched and billed regularly to achieve a lower bank transaction fee.
 - * Prepaid F7 Pay Billing is possible where a customer's account is debited after each credit card purchase. Promotional discounting or premiums may entice prepaid billing.
 - * Credit Card numbers encrypted for security.

Credit Card Sales and Cash Sales are retrieved with an Audit Card and then downloaded to a PC where the transactions are exported to a newspaper's billing program. Each Audit Card can retrieve approximately 1000 Credit Card sales and can be used on multiple mechs.

Flex Mech

Credit Card Reader

Sho-Rack's Credit Card Reader interacts with our Flex Mech and accepts Smart (Chip) Cards as well as Credit Cards.
